Why not Google?

- Anyone can publish anything on the Internet.
- Millions and millions of hits.
  - Which are accurate and valid?
  - Requires your time to evaluate.
- Does not include information found in library databases of scholarly journals.
Databases are key

- Premium information resources
  - journal and newspaper articles
  - scholarly information from published works
- Searchable
- Often contain full-text articles
How to start?

- Put the problem in the form of a question
- Search
- Examine your results
- Revise your search question if needed
What is the problem?
“I need to know about females who are victims in violence from partners they’re intimate with.”

What is the question?
“What are some specifics regarding female victims of intimate partner violence?”

What are the question’s concepts?
1: female victims  2: intimate partner violence
3: family violence   4: domestic violence
5. spousal violence  6. acquaintance violence
General Rule

Start big then narrow down

Is the reason for 0 results because there is nothing in the ______ database or (more likely) were the wrong words used?
Search databases (not Google)
